D&M Vacuümsystemen B.V. is specialized in offering turn-key solutions for (high-quality and complex) vacuum systems for over 25 years.

We have received confidence and credits from various prestigious companies and institutes that are active in the following industries:

- Semiconductor
- Lighting
- Research applications
- Solar systems
- Thin film deposition
- Analytical
- Cryogenics

Process Equipment

- Custom design for each processing, substrate, and handling need.
- Innovative approach, in-house engineering, manufacturing and process knowhow, our process equipment enables manufacturing and measurements for high-tech industries
- Leading position in the supply of Qualification Tools for EUV parts (monoparts and assemblies).
- Strong player in customer specific design and manufacturing of low-volume, and highly complex parts, assemblies and systems

Engineering & Manufacturing

- Dedicated and extensive workshop to manufacture our parts and systems in-house.
- Ability to produce clean, complex products on our state-of-art machinery. Vacuum chambers up to 4000mm!

Our systems are assembled, cleaned and tested in our cleanroom facilities.

Service

- Servicing of all type of vacuum pumps (rotary vane, scroll, cry and dry pumps).
- In-depth knowledge of specific component/pump know-how including behaviour of pumps in different type of processes (industry specific knowledge).
- Service Level Agreements (SLA) for our pumps and systems
