DCD

Enabling product launches

Partner in product & production development

DCD is a family owned private company founded in 1983 and is located in Eindhoven and Arnhem area. Our heart is at innovation and we are dedicated to create out of the box functional solutions for products that matter. We focus on technical product development and development of supporting equipment to enable product launches. We consult, design, develop and realize products from idea up to prototypes, small series and support our customers with related industrial production equipment for almost four decades. We apply our in-depth technical knowledge of product and equipment development to consult our customers about Smart Industry Implementations enabling manufacturing flexibility for customized products with a high diversity and reduced product cost prices.

All our people are highly educated, motivated, enthusiastic and keen to invent your products of the future enabling successful product introductions. Keywords where we stand for are:

- Innovative
- Function development
- From idea to zero series
- Flexibility
