

Ecoclean: Industrial Parts Cleaning Solutions

Industrial Parts Cleaning

Ecoclean develops forward-looking machinery for **industrial parts cleaning and degreasing, ultrasonic precision parts cleaning, high-pressure water jet deburring, surface preparation and surface treatment**. Its globally leading solutions help companies around the world in conducting efficient and sustainable manufacturing to high quality standards.

Our customers come from a **wide range of industries** in **component production and precision manufacturing** - such as **aerospace, medical technology, the automotive industry and its suppliers, the high-tech industry, the semiconductor industry and high-vacuum industry, precision optics, microtechnology and precision engineering**, as well as the **fasteners and watch & jewelry** industries.

As a **worldwide market and technology leader**, we are present at production sites in Germany, Switzerland, France, the Czech Republic, the USA, Mexico, India and China with around 900 employees, where we also operate own test centers and laboratories.

A Clean Business

In industrial parts cleaning it depends on achieving the necessary cleanliness requirements for either following processes or for a high quality and functionality of the parts to be cleaned. Additionally, it is all about conducting cleaning processes in an efficient and sustainable manner.

Innovative Cleaning Solutions

Our comprehensive range of cleaning equipment provides systems for virtually all types of cleaning tasks. From coarse to intermediate to ultrafine precision cleaning.

For the reliable and efficient removal of oil, grease, emulsions and swarf.

Cleaning with

- Aqueous media
- Non-halogenated hydrocarbons
- Alternative solvents

Standard Processes

- Spray cleaning, Immersion cleaning
- Ultrasonic cleaning
- Vapour degreasing
- Dry cleaning
- Injection flood washing
- Low pressure plasma cleaning
- Pulsated Pressure Cleaning (PPC)
