

## EXPERTS IN PRECISION ENGINEERING

# Precision engineering and mechatronic solutions in ambient, vacuum and cryogenic environment

JPE is a small but highly skilled independent engineering group for development and realization of high-tech machinery and instruments. After several years of experience in the high-tech industry at companies like ASML and Philips, Huub Janssen founded JPE in 1991. Nowadays, we have built up a team of professionals which are able to find and implement solutions for very challenging engineering requests.

### [jpe.nl / products](http://jpe.nl/products)

- Cryogenic
- (UH-)Vacuum
- Static / dynamic / thermal stability
- Sub- $\mu$  / nanometer resolutions
- Play free
- Anti-magnetic materials
- High load capacities
- Large strokes

### [jpe.nl / projects](http://jpe.nl/projects)

- System architecture / engineering
- Feasibility studies
- Thermal & dynamic analysis
- Precision engineering
- Mechatronics & control
- Electronics & software
- Integration & testing
- Project management

### [jpe.nl / precisionpoint](http://jpe.nl/precisionpoint)

- Engineering fundamentals
- Materials & manufacturing
- Construction fundamentals
- Construction design & examples
- Dynamics & control
- Actuators & sensors
- Electronics & software
- Optics & Optomechanics
- Thermomechanics
- Mathematics
