

**ALBIS** is one of the world's leading globally operating companies in the distribution of technical thermoplastics and thermoplastic elastomers. With technical know-how, a strong distribution network and a passion for the best solution, ALBIS offers its customers as an independent distributor one of the market-leading and most comprehensive product portfolios for the entire plastics processing industry. With 25 locations worldwide and 500 employees, the company, headquartered in Hamburg, Germany, is strongly represented in Europe with a growing presence in EMEA and Asia Pacific.

Should anything go wrong after production begins, we will be there to support you. Our global team of application development engineers are experts in their field - and are never far away.

### Walk on the green side of life

The desire for more "sustainability" encounters us every day, everywhere and in various contexts. Especially when it comes to the use of plastics, opinions often differ. Nevertheless, limited natural resources is just one of the aspects that should encourage us to get into action without any delay. As an international company, ALBIS is aware of its responsibilities! Sustainability is an integral part of our growth strategy.

The proportion of ALBIS' portfolio based on renewable raw polymers or recycles expands constantly. ALBIS and its business associates deliver diverse, sustainable solutions as a "one-stop-shop"-partner. It is important to us to be on regular exchanges with our customers and partners. This interaction enables us to develop smart solutions in a joined effort. Acting together - for the benefit of all involved - is the ALBIS approach to breathe a little more life into the word "sustainability" every day.

Walk on the green side of life.
