

Innovative Inkjet solutions

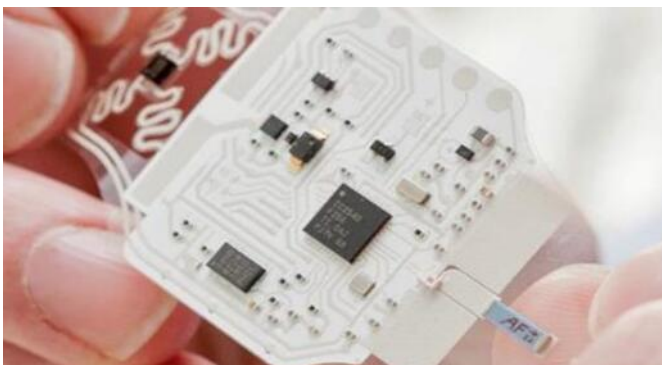

Meyer Burger (Netherlands) B.V. is a world leading provider of innovative inkjet printing equipment.

With its **PIXDRO** functional inkjet systems, Meyer Burger serves several industries: **OLED, photo voltaic, printed electronics, semiconductor, batteries, PCB and photo chemical milling.**

Meyer Burger offers R&D systems up to complete manufacturing solutions, including pre- and post-processing and automation modules, serving customers world wide.

At Meyer Burger we push the boundaries of innovation. With new breakthrough technologies and products, in-depth process knowledge and out-of-the-box methodology we offer the best solutions for our customers. By replacing existing value chains Meyer Burger enables integrated combined functionalities in electronic devices.

Under its award winning **PIXDRO** brand, Meyer Burger offers complete inkjet equipment design, assembly and application support in Eindhoven, the Netherlands. With over 12 years of experience, PIXDRO is the benchmark in the manufacturing of advanced inkjet printers. The PIXDRO inkjet portfolio consists of versatile research equipment and high throughput mass-production systems.

The modular design of PIXDRO inkjet systems aligns well with the growing and changing demands of our customers, and help them in succeeding in dynamic markets.
