

Building smarter solutions for a changing world

Neways Electronics International

is a highly specialised and vertically integrated life cycle partner and system innovator for high tech industrial electronics solutions for the semiconductor, automotive, medical and regular industry.

Core activities are centered around the development, manufacturing and logistics of electronics. These are assembled according to the market segment's applicable standards.

With over 50 years of experience in the Electronics manufacturing world we can support you in any phase of your product life cycle.

Whether it's at the definition of your product roadmap, development, manufacturing or mid-life updates of your electronics, our 2,700 employees are dedicated to support you. Because of the interplay between highly demanding markets in which Neways is active, we offer customized and out of the box solutions.

Whether it's PCBA assembly, box build, connectivity, system integration, hybrid electronics or development, Neways has expertise, knowledge and infrastructure.

With 17 sites, strategically located in six countries (EU/US/CN regions) we ensure your supply chain is reliable and optimised.

Our competences

are focussed on your business continuity with a dedicated team that actively monitors the life cycle status of your products and initiates proposals to maximise availability at optimal costs.

Neways, your system innovator

As an EMS Life Cycle Partner and System Innovator we create smarter solutions for a changing world. Not only do we respond to requests of the market, but furthermore, we get involved in the development and engineering processes of our customers at an early stage, proactively providing concrete solutions and offering more added value.

Communication and intense cooperation in projects is incorporated in our Neways' DNA so we can efficiently design and manufacture what you need, when you need it and where you need it.
