

## Complete solutions from one single source

### TURN IDEAS INTO PRODUCTS

- Product & Process Development that doesn't stop with a prototype
- Outdoor & Harsh environment: smart sensor modules, LED, ..
- Expertise in development of smart products
- Contract manufacturing: solder, cleaning, pre-treatment, gluing, potting, gaskets, dispensed seals, ...
- We create a complete product solution exactly to your needs
- Expertise in Improving reliability by unique potting process technologies for sealing electronics
- Designs with low initial costs – fast time to market
- In-house automation:
  - we automate following your project volume growth

### AT THE HEART OF YOUR AUTOMATION

- Automatic assembly production lines
- Robot cells - Cobots
- Integration of process-technologies:
  - surface treatment
  - gluing & potting
  - curing-systems
  - US welding
  - laser welding
  - soldering
- Visual inspection & automated process controls
- Test & measurement solutions
- Packaging
