

## EMPOWERING YOUR BAKERY TO RISE

At AMF, we support bakeries around the world with best-in-class unit equipment and complete system solutions to optimize operations, improve product quality and empower bakery teams.

Our solutions move your baked goods efficiently and reliably through the entire baking process—from mixer to marketplace.

We're made up of the world's wealth of bakers and engineers, pioneers and problem-solvers, all committed to one common goal: creating the best-in-class unit equipment and complete system solutions to help grow your bakery as we **Rise Together**.

**AMF Bakery Systems Europe consists of:**

**AMF Tromp:** Europe's leading sheeting, laminating, depositing and decorating solutions for bakeries and food producers, we also specialize in pizza production systems and lines.

**AMF Den Boer:** enhanced baking capabilities including step proofers, modular tunnel ovens, step coolers and seamlessly integrated pan handling systems. Den Boer has introduced the world's 1st Hydrogen fueled bakery oven, called Multibake VITA. Zero emission baking starts here, and we love to help producers lower their footprint this way. At AMF, we don't just speak about innovation; **we engineer it.**

The evidence is in the high-speed solutions synonymous with the AMF name. Through precision engineering and systems expertise, we create custom unit equipment and complete system solutions that help bakery brands increase efficiency, consistency, safety, and profitability.
