## The New Dimension of Laser Processing

PERFORMANCE  
AUTOMATION

# PI

High-performance motion and control solutions are indispensable in industrial laser materials processing. PI creates a new dimension of possibilities in order to further increase throughput and precision – flexible, application specific, and scalable. Discover our solutions for the world of tomorrow:

With our competence areas NANO POSITIONING, PIEZO TECHNOLOGY, and PERFORMANCE AUTOMATION we just get started where others stop!

IT'S  
**POSSIBLE**
