

**Precision Micro is a production photo chemical etching specialist, producing more than 50 million components each year for industry-leading names and having the capacity to fulfil even the highest-volume orders.**

#### How we do it

You imagine the concept. We make it a reality. From high-performance aerospace and automotive alloys to hard-to-machine medical grade titanium, we work with you to design then photo-etch precision, complex, burr and stress-free components to the most exacting specifications, with pinpoint precision.

#### Making a better today for our customers

We solve challenges through a unique fusion of art and science: creativity and imagination with scientific focus. We apply this fusion to photo-etch the products customers rely on to make today safer, more reliable, comfortable and efficient. Through art and science in world-class manufacturing, we help them make a better today.

#### Why partner with us?

##### *Unrivalled know-how*

Precision Micro has pioneered photo etching for over half a century, setting the standard for accuracy and repeatability.

##### *Proven capability*

We are the only photo etching company accredited to AS9100, IATF16949, ISO9001 and ISO14001, so you can rely on the stability and capability of our processes.

##### *Highest production capacity*

At 44,000 sq ft, our state-of-the-art photo etching plant offers the largest sheet etching capacity in Europe.

##### *Specialists in hard-to-machine metals*

We specialise in etching proprietary super-alloys which exhibit excellent mechanical strength, resistance to thermal creep deformation, good surface stability and resistance to corrosion or oxidation.

#### *Global technical support*

We have sales offices and partners in locations that enable us to respond quickly to customer requirements.

#### *Added value technologies*

We offer a number of additional in-house services which can be combined with photo etching to produce components with greater accuracy, unique characteristics and improved functionality, reducing customers' supplier base and time-to-market.

#### *Low risk*

Precision Micro is well-invested, enabling us to deliver the levels of product quality, productivity and competitiveness expected by major international companies.
