

The Dutch Automotive Industry

RAI Automotive Industry NL is the cluster organization of the Dutch automotive industry, mobility sector and related knowledge and education centres with about 175 members.

RAI Automotive Industry NL supports the innovative Dutch automotive sector by profiling and representing the sector, nationally and internationally. An important basis is formed by the national eco system that is part of the innovative Top Sector High Tech Systems & Materials (HTSM), in which industry, education, science and governments parties actively work together.

RAI Automotive Industry NL is part of the RAI Association which has a history of 125 years.

The focus areas of **RAI Automotive Industry NL** are:

- Green Mobility
- Smart Mobility
- Materials & Manufacturing
- Internationalization
- Human Capital

The ambitions of RAI Automotive Industry NL is to achieve:

- 0 Emission
- 0 Accidents
- 0 Congestion

RAI Automotive Industry NL is located in Helmond at the Automotive Campus, within the Brainport Area. Its headquarters is in Amsterdam (RAI Association).

The national automotive industry has great potential for growth and contributes to solving social problems in the field of safety, sustainability and mobility.
