

Connecting the dots to make your system work!

steerED Technology,

Founded by experienced industry professionals, steerED Technology is an interconnection solutions provider. We serve our customers with high mix, low volume connectors, cable assemblies and flex assemblies, fiber solutions and test fixtures. In many cases we use our standard building blocks to allow low volume custom manufacturing.

Our products:

- Copper wire based cabling systems.
- Plastic and glass Fiber Optic cables and systems.
- Semiconductors and sensor test-fixtures and systems.
- Foil based interconnect solutions.
- Cables for VME, CPCI & VPX backplanes.
- (Ultra)-Miniature Microwave interconnects.

Our organisation:

In 's-Hertogenbosch we do have our engineering, prototyping and testing capabilities. Higher volumes are produced in our S2C Elec plant in France.
