

High-Tech Solutions for the Challenges of Tomorrow

Technobis Group

Technobis is a group of companies providing development and supply of high-tech instruments for companies worldwide in medical, pharmaceutical and high-tech markets.

Realising high-tech products that matter, together

Specialized in complete product development trajectories for OEM and start-up companies. We help you to come from an idea to a successful turnkey product, prototype or series product for medical, pharmaceutical and high-tech markets worldwide.

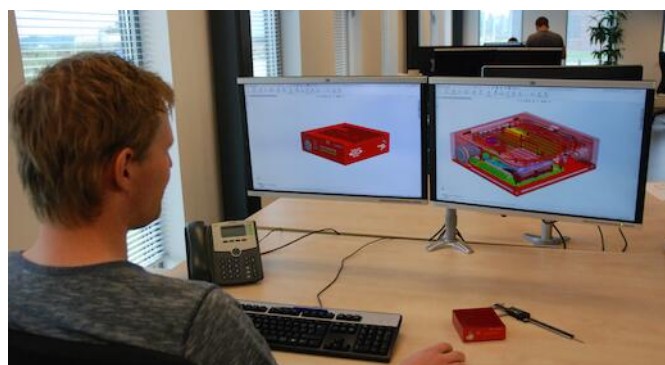

Help research succeed!

Global leading technology provider for solid-state research, process development and formulation.

Our in-house competences cover high-tech product development of hard- and software and scientific teams with knowledge on solid state and chemical engineering.

With more than 500 units in the field, a large community of scientists have been enabled to make a significant contribution to the accelerated development of new pharmaceuticals.
