

Effective Quality Management for Sustainable Business Success

For a World Full of Quality

We create innovative software for quality. Since 1994, manufacturing companies in every sector of industry and of all sizes have been relying on our quality management software. They appreciate its usability, superior technology, and Babtec's sustainability. As an experienced and reliable quality partner, we stand for a quality concept that goes beyond normative requirements. Our software and cloud services meet all requirements of modern, digital and collaborative quality management.

Our success is based on developing its QM products to suit the market's needs, on the expertise of its staff and its close cooperation with its customers and ERP partners. You profit from our QM Software, from project analysis up to the installation and subsequent system maintenance. We provide our services to all-sized enterprises and company groups from a wide variety of industry sectors. Our goal is to make the world a little better every day and to support companies on their way to Quality Excellence.

BabtecQ: Software for Quality Management

With our fully integrated, modular software for quality management BabtecQ, companies from all over the world and from all industries ensure their sustained corporate success.

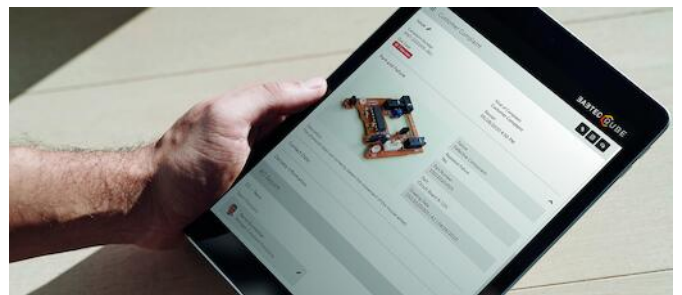

In BabtecQ, all relevant quality data can be exchanged, for example, between FMEA, inspection planning, audit, complaint and action management and many other modules. With the help of the information gained from this exchange, you can continuously optimize your quality processes and make knowledge available throughout the company.

Furthermore, our software can be seamlessly connected to existing IT structures, e.g. ERP software, in your company.

BabtecQube: The Cloud Network for Quality

With our cloud-based platform BabtecQube we are setting new standards in networking and collaboration. Here the company boundaries are dissolved in favor of cooperative quality work along the entire supply chain - with the aim of creating a quality supply chain.

From goods inspection and complaints management to the processing of tasks and measures: with BabtecQube, you can take collaboration and communication with your business partners to a new level.
