

THE ONLY PROGRESS IS HUMAN

Dassault Systèmes, the **3DEXPERIENCE** Company, is a catalyst for human progress. We provide business and people with collaborative 3D virtual environments to imagine sustainable innovations. By creating virtual experience twins of the real world with our **3DEXPERIENCE** platform and applications, our customers push the boundaries of innovation, learning and production. A pioneer in computer-aided design founded in 1981, Dassault Systèmes has expanded into a diverse range of software categories, including 3D modeling, simulation and test, manufacturing and logistics, information intelligence, and social and collaborative processes.

Dassault Systèmes' customers range from industry leaders to disruptive startups. Our customers remove 110 tons of plastic from the ocean every day, include all of the top ten electric vehicle manufacturers, and generated 74% of global wind power last year. Nine of the top ten smartphone manufacturers and five of the top six laptop manufacturers use our solutions. Almost half of the world's top drug and healthcare companies are our customers. They use our **3DEXPERIENCE** platform to connect people, ideas and data. By designing and testing their ideas in the virtual world, they can better respond to today's experience economy, in which consumers value experiences over products. In addition, **3DEXPERIENCE** is expanding from "Things to Life", where the human body can be modeled with a virtual experience twin and tested as precisely, safely and effectively as products in traditional industry.

Dassault Systèmes' corporate culture is based on what we call the **IFWE** spirit. We promote a questioning mindset, exploring possibilities and connecting people to bring about meaningful change. Dassault Systèmes' 20,000 employees bring value to more than 270,000 customers of all sizes, in all industries, in more than 140 countries. Our ultimate purpose is to help people make possibilities real. For more information, visit us at www.3ds.com.

3DEXPERIENCE Portfolio

- **CATIA** is the world's engineering and design leading software for product 3D CAD design excellence. It addresses all manufacturing organizations, from OEMs through their supply chains, to small independent producers.
- **BIOVIA** provides scientific solutions to discover, design, develop and deliver innovative drugs, materials and formulas.
- **SOLIDWORKS** leads the global 3D computer-aided design (CAD) industry with easy-to-use 3D software that trains and supports the world's engineering and design teams as they drive tomorrow's product innovation.
- **DELMIA** helps industries and service providers connect the virtual and real worlds of global operations to re-imagine business for achieving sustainable excellence and delivering orchestration across value networks.
- **SIMULIA** delivers realistic simulation applications that enable users to reveal the world we live in.
- **ENOVIA** enables business and industry innovators to collaboratively build and execute a successful plan, transforming market opportunities into marketplace advantages.
- **3DEXCITE** drives marketing transformation with automated content production pipelines and collaborative networks based on the **3DEXPERIENCE** platform.
